Retraction notice to: Facial Expressions of Emotion Reveal Neuroendocrine and Cardiovascular Stress Responses

Biol Psychiatry 58:743–750

Jennifer S. Lerner, Roxana M. Gonzalez, Ronald E. Dahl, Ahmad R. Hariri and Shelley E. Taylor

Department of Social and Decision Sciences (JSL, RMG), Carnegie Mellon University; Department of Psychiatry (RED, ARH), University of Pittsburgh School of Medicine, Pittsburgh, Pennsylvania; Department of Psychology (SET), University of California, Los Angeles, California

This article has been retracted at the request of the authors and/or the Editor-in-Chief.

There were errors in the Articles in Press version of Li X, Friedman AB, Zhu W, Wang L, Boswell S, May RS, et al (in press): “Lithium regulates glycogen synthase kinase-3 in human peripheral blood mononuclear cells: implication in the treatment of bipolar disorder.” *Biol Psychiatry*. (doi:10.1016/j.biopsych.2006.02.027, available online June 27, 2006),” which have been

Reason: The original second author of this paper, Roxana M. Gonzalez, has acknowledged that she misreported data supporting an exploratory mediation analysis reported at the end of the original paper. None of the co-authors participated in or had knowledge of the second author’s actions. The second author cooperated fully in determining the scope and impact of her actions and in rectifying the research record.

The corrected version of this article appears prior to this notice on pages 253–260 of this issue of *Biological Psychiatry*.

doi:10.1016/j.biopsych.2006.11.002

corrected. All concentrations throughout the article that read “mmol/mL” should have read “mmol/L.”

The publisher apologizes for this error.
