

glaucoma or to decrease the risk of developing the disease. As population studies and clinical trials accrue longer follow-up times, we may have a clear answer to the intriguing questions raised by Lee and colleagues' interesting study.

M. CRISTINA LESKE, MD, MPH
Stony Brook, New York

Errata

On page 815 of the April 2003 issue, the figure legends for Figure 3A and Figure 3B were inadvertently reversed in the article “Clinical and Radiologic Characteristics of the Imploding Antrum, or ‘Silent Sinus,’ Syndrome” (*Ophthalmology* 2003;110:811–8). The authors and editors apologize for this oversight.

The author sequence for “Intacs for Keratoconus” (*Ophthalmology* 2003;110:1031–40) was erroneously changed at the proof stage. The correct sequence for the authors of this article as submitted is Brian S. Boxer Wachler, MD, Jonathan P. Christie, OD, Naveen S. Chandra, MD, Brian Chou, OD, Tommy Korn, MD, Richard Nepomuceno, MD.
