

Index

Note: Page numbers of article titles are in **boldface** type.

A

- Abdominal pain, and pelvic pain, in women,
diagnosis of, 63–64
 appendicitis as cause of, 62
 diagnostic precautions in, 62
 discharge from emergency department
 in, management in, 62–63
 emergency department evaluation of,
 pearls and pitfalls in, **61–72**
 epidemiology of, 61
 in elderly patients, 67–70
- Achilles tendon, rupture of, 185–186
- Acute cardiac ischemia time-sensitive
 predictive instrument, 50
- Airway, difficult, definition of, 1
 emergency management of, **1–26**
 invasive management of, 14–18
- Analgesia, procedural, for children. See
 *Sedation and analgesia, procedural,
 for children,*
- Anesthesia, in lacerations, 209–210
 topical and regional, 210
- Anesthetics, local, allergies to, 209
 classes of, 209
 for procedural analgesia in
 children, 130
 topical, for procedural analgesia in
 children, 129
- Angina pectoris, unstable, 27
 early diagnosis of, 28
- Anginal pain equivalents, in acute cardiac
 ischemia, 32
- Antibiotics, in cat bites,
 222–223
 in dog bites, 221, 222
 in human bites, 224
 in lacerations, 215
- Antidotes, in pediatric poisoning cases, 114,
 115
- Appendicitis, signs and symptoms of, 62,
 66–67

B

- Barbiturates, for procedural analgesia in
 children, 128–129
- Benzodiazepines, for procedural analgesia
 in children, 128
- Bites, lacerations due to, management of,
 220–226
 primary wound closure in,
 224–225
 tetanus prophylaxis in, 225
 wound management in, 224
- Boutonnire deformity, 180–181
- Bowel irrigation, in pediatric poisoning
 cases, 113

C

- Calcaneus, fractures of, 192–193
 evaluation of, 193, 194
 mechanism of, 192–193
 symptoms of, 193
 treatment of, 193
 talus and, fractures of, 189
- Cardiac ischemia, acute, atypical
 presentations of, 33–34
 cardiac imaging and, 49–50
 clinical outcomes of, 52–54
 clinical presentation of, 30–34
 computer-based decision aids in,
 50–51
 diagnosis of, **27–59**
 clinical impact studies of,
 46–47
 test performance studies of,
 44–45
 electrocardiogram in, 36–43
 gender as factor in, 51
 hospital admission in, 27–28
 identification in patient sub-
 groups, 51–52
 medical history taking in, 34–35
 methodologic issues in, 29–30
 physical examination in, 35–36
 race as factor in, 51–52

- Carpal dislocations, 168–169
 complications of, 171
 diagnosis of, 172–173
 evaluation of, 171–172
 management of, 173–174
- Cat bites, antibiotics in, 222–223
 incidence of, 222
 infection in, 222
- Central slip, acute rupture of, 180–182
- Cephalosporins, in fever in infant,
 89, 95
- Charcoal, activated, in pediatric poisoning
 cases, 113
- Chest, pain or discomfort in, in acute
 cardiac ischemia, 30–32
- Child(ren), household products toxic to,
 106, 112
 medications toxic to, 104, 112
 plants toxic to, 106
 poisoning cases in. See *Poisoning cases,
 pediatric.*
 procedural sedation and analgesia for.
 See *Sedation and analgesia,
 procedural, for children,*
 seizures in, intoxicants causing, 109
 toxic exposure in. See *Toxic exposure,
 in children.*
- Chloral hydrate, for procedural analgesia in
 children, 127–128
- Combivite, 10
- Compartment syndrome, clinical signs of,
 196
 diagnosis of, 196–197
 fractures associated with, 195
 incidence of, 195
 mechanism of, 193–195
 pathophysiology of, 195
 treatment of, 197
- Computed tomography, in subarachnoid
 hemorrhage, 83, 84
 to detect foreign bodies in lacerations,
 218
- Coronary artery disease, understanding of,
 28
- Creatine kinase, measurements of, 43
- Creatine kinase subunit, measurements of,
 48
- Cricothyroidotomy, surgical, 18
- Cricothyrotomy, needle,
 16–17
 surgical, 17–18

D

- Dog bites, antibiotics in, 221, 222
 incidence of, 220, 221
 infection in, 220–222
- Drug(s), administration of, errors in, 149
 safety checks to prevent,
 151
 interventions in, 152
 complications of, 141–143
 as adverse event, 141
 systems analysis and, 142–143
 dispensing of, errors in, 148, 151
 interventions and, 151
 safety checks and, 148–149
 ordering of, and delivery of, five stages
 of, 143–153
 interventions in prescribing
 stage of, 145
 monitoring of, 152–153
 interventions and, 153
 prescribed, inadequate knowledge of,
 and errors, 144–145
 prescribing errors and, 143–144
 and familiarity with patient, 146
 pediatric challenges and,
 146–147
 standardized bar codes on, 155
 toxic for children, 104, 112
 transcribing errors and, 147
 elimination of, 147–148, 150

E

- Echocardiography, in diagnosis of acute
 cardiac ischemia, 49–50
- Elderly patients, abdominal pain in, 67–70
 electrocardiograms in evaluation of, 69
- Electrocardiogram(s), continuous/serial, in
 acute cardiac ischemia, 42
 exercise stress, in acute cardiac
 ischemia, 43
 in evaluation of older patients, 69
 nondiagnostic patterns on, in acute
 cardiac ischemia, 41
 nonstandard lead, in acute cardiac
 ischemia, 42–43
 normal, in acute cardiac ischemia,
 41–42
- Q waves on, in acute cardiac ischemia,
 41
- ST-segment and T-wave
 abnormalities, in acute cardiac
 ischemia, 40–41
 standard 12-lead, in acute cardiac
 ischemia, 36–39
- Elimination, enhanced, in pediatric
 poisoning cases, 113–114

Endotracheal tubes, directional, 8–9

Esophageal-tracheal tubes, for difficult intubation, 10–11

F

Fever, definition of, in febrile infants, 90–91
in infant. See *Infant(s), febrile*.

Fist, closed, injury of, 182–184

Flexor digitorum profundus, rupture of, 178

Foot, normal, posteroanterior radiograph of, 189

Foreign bodies, in lacerations, history and physical examination for, 216–217
imaging studies in, 217–218
retained, complications of, 219
treatment and removal of, 218–219

G

Galeazzi and Monteggia fracture dislocation, 160–165, 166, 167

Galeazzi fracture dislocation, 160–165, 168

Gastrointestinal decontamination, in pediatric poisoning cases, 111–113

Glenohumeral joint, dislocation of, evaluation and management of, 159–160, 161, 162

Goldman chest pain protocol, 50

Growth plate fracture, pediatric, 197–199
diagnosis of, 198
Salter-Harris classification of, 197–198

H

Hand, closed tendon injuries of, 177–178

Head tilt axes, 8

Headache, causes of, 73, 74

Hemorrhage, subarachnoid. See *Subarachnoid hemorrhage*.

Hemostasis, in lacerations, 210

Hindfoot, fractures of, 189

Household products, toxic for children, 106, 112

Human bites, antibiotics in, 224
infection in, 223
types of, 223

I

Infant(s), febrile, age categories of, 90
definition of fever in, 90–91
evaluation and management of, background of, 91–97
in emergency department, **89–99**
hospitalization of, 89
management of, overview of, 97–98
risk in, clinical and laboratory findings defining, 93–95
clinical scoring in, 91–92
Philadelphia Protocol in, 95–96
age limitations and, 96–97
Rochester criteria for, 92
terms associated with, 90–91

Infection, in cat bites, 222
in dog bites, 220–222
in human bites, 223

Inhalants, for procedural analgesia in children, 130

Intoxicants, biotransformed, with latent manifestations, 111
causing pediatric seizures, 109

Intubation(s), difficult, alternative noninvasive techniques in, 6–7, 8
directional tubes for, 8–9
esophageal-tracheal tubes for, 10–11
history taking in, 2
laryngeal mask airway in, 11–12
lighted stylets for, 9
physical examination in, 2–6
predisposing factors for, 3
stylets for, 9
digital/tactile, 7–8
nasotracheal, 12–14
rapid sequence, intubation in, 22–23
neuromuscular blocking agents for, 21–22
premedication for, 21
preparation for, 19–21
retrograde tracheal, 14–16
translaryngeal guided, 14–16

Ischemia, acute cardiac. See *Cardiac ischemia, acute*.

L

Lacerations, anesthesia in, 209–210
due to bites, management of, 220–226
foreign bodies in. See *Foreign bodies*.

Lacerations (*continued*)
 management of, in emergency department, **207–233**
 medical history taking in, 207–208
 physical examination in, 208
 treatment and consultation in, 208
 wound closure in. See *Wound closure, in lacerations.*
 wound preparation and evaluation in, 209–211

Laryngeal mask airway, in difficult intubation, 11–12

Lisfranc fracture dislocation, 186–189, 190
 causes of, 186
 diagnosis of, 188–189, 190, 191
 evaluation of, 187

Lower extremity, injuries of, management of, 185–193

Lumbar puncture, in subarachnoid hemorrhage, 75, 83

Lunate and perilunate injury, 166–174

Lunate dislocation, 170

M

Mallampati classification of oral opening, 4, 5

Mallet finger, 178–180

Medication errors, in emergency department, **141–158**
 incidence of, 141
 information technology and, 154–155

Mouth, opening of, Mallampati classification of, 4, 5

Myocardial infarction, acute, 27
 hospital admission in, 27

Myocardial necrosis, biochemical markers of, 43

Myoglobin, diagnosis of myocardial infarction and, 48–49

N

Nasotracheal intubation, 12–14

Needle cricothyrotomy, 16–17

Nervous system, symptoms in, of pediatric poisoning, 107–108

Neuromuscular blocking agents, for rapid sequence intubation, 21–22

O

Orogastric lavage, in pediatric poisoning cases, 112–113

Orthopedic emergency, high-risk, evaluation and management of, **159–205**

Ovarian adnexal torsion, abdominal pain in, 65–66

Ovarian cysts, rupture of, abdominal pain in, 66

Oxyhemoglobin, subarachnoid hemorrhage and, 82

P

Pelvic inflammatory disease, criteria for hospitalization in, 64
 outpatient management of, 65

Pelvic pain, and abdominal pain, in women, diagnosis of, 63–64

Percutaneous transtracheal ventilation, 16–17

Perilunate dislocation, 169–170

Pharmacists, ward-based clinical, 155

Plants, toxic for children, 106

Poison control centers, 101

Poisoning cases, pediatric, as ongoing problem, 101–103
 neurologic symptoms in, 107–108
 patient history and, 103–107
 physical examination in, 107
 prevention of, 102–103
 vital signs in, 108–110

Puncture wounds, 219–220
 plantar, complications of, 219
 exploration of, 220

R

Rabies, postexposure prophylaxis, 225, 226

Radiography, to detect foreign bodies in lacerations, 217

Root cause analysis, 154

S

Scaphoid, fracture of, 174, 175
 diagnosis of, 176
 nonunion of, 176, 177
 treatment of, 177
 function of, 175

- Scapholunate dissociation, 169
- Sedation and analgesia, procedural, for
 children, barbiturates in, 128–129
 benzodiazepines in, 128
 chloral hydrate for, 127–128
 customizing of, 133
 definitions and terminology in, 121–123
 dissociative agents for, 131–132
 for painful procedures, 130
 in emergency department, **121–139**
 inhalants in, 130
 involving minimal pain, 129
 local anesthetics in, 130
 noninvasive procedures for, 127
 personnel, equipment, and monitoring for, 124–127
 physical assessment for, 123–124
 postprocedure recovery from, 133–134
 research directions in, 134–135
 reversal agents for, 132–133
 standards and guidelines for, 123–127
 systemic analgesics for, 131
 topical anesthetics in, 129
- Seizures, pediatric, intoxicants causing, 109
- Shoulder, posterior, dislocation of, evaluation and management of, 159–160, 161, 162
- Skin closure tapes, in wound closure in lacerations, 213–214
- Sonography, to detect foreign bodies in lacerations, 218
- Spectrophotometry, to assess xanthochromia, 82
- Spine, cervical, assessment of mobility of, in difficult airway, 6
- Staples, in wound closure in lacerations, 213, 215, 216
- Subarachnoid hemorrhage, causes of, 73
 classic case of, 75
 diagnosis of, in emergency department, **73–87**
 evaluation for, 79–83
 diagnostic algorithm for, 80
 patients requiring, 77–79
 incidence of, 73
 lumbar puncture in, 75, 83
 misdiagnosis of, 73–76, 79
 oxyhemoglobin and, 84
 without headache symptoms, 84
- Sutures, in wound closure in lacerations, 212–213, 215, 216
-
- T**
- Talar neck fractures, 190
 evaluation of, 192
 mechanisms of, 190–191
 symptoms of, 191–192
- Talus, and calcaneus, fractures of, 189
 functions of, 190
- Technetium-99m-sestamibi myocardial perfusion imaging, 50
- Temporomandibular joint, examination of, in difficult airway, 3–4
- Terry Thomas sign, 169
- Tissue adhesives, in wound closure in lacerations, 214–215
- Tongue, examination of, in difficult airway, 4
- Toxic exposure, in children, causes of, 101–102, 105–106
 early versus delayed
 manifestations of, 110
 fatalities associated with, 110–111
 length of observation in, 114–116
 management of, **101–119**
 presenting signs and symptoms of, 107–110
 selected issues in, 111–114
- Troponin I, diagnosis of myocardial infarction and, 48
- Troponin T, diagnosis of myocardial infarction and, 48
- Tubo-ovarian abscess, 64, 65
-
- U**
- Ulnar collateral ligament, rupture of, 182, 183
- Upper extremity, injuries in, management of, 159–185
-
- V**
- Ventilation, percutaneous transtracheal, 16–17

W

Wound closure, in lacerations, 211–215
 skin closure tapes in, 213–214
 staples in, 213, 215, 216
 sutures in, 212–213, 215, 216
 timing of, 212
 tissue adhesives in, 214–215

Wounds, care of, in lacerations, 215–216
 cleansing of, in lacerations, 210–211

 preparation and evaluation of, in
 lacerations, 209–211

Wrist, normal, view of, 173, 174
 sprains of, 166

X

Xanthochromia, in subarachnoid
 hemorrhage, 82
