

Index

Note: Page numbers of article titles are in **boldface** type.

A

- ADVanced eschelON (ADVON) team, 201
- Aeromedical evacuation (AE), aircraft for, 223–224
crews for, 222
critical care air transport team in, 226–231
enplaning patients, 224–226
environment of, research in, 222
flight nurse and, training and qualifications for, 221–222
in military operations other than war, 225
military aircraft environment of care in, 171–172
mission of, Doctrine for Health Services Support and, 223–224
global presence in, 222
in-flight patient care and, 223, 225
worldwide, 222–223
worldwide mobility of, 222–223, 225
- Aeromedical isolation team (AIT), for biological safety level-4
aircraft flight training for, 253
courses for, 252–253
history of, 249–250
personnel on, 250
- Aircraft carriers, ICU on, 235
medical department on, physical facilities, 234–235
staff, 235–236
operating room on, 236
with Amphibious Readiness Group, 237
- Aircraft transit isolator (ATI), for biological safety level-4, design and concept of, 249–252
- Air Force nursing, environment of care and, 172
environment of care in, 171–172
unique characteristics of, 171–173
Wilford Hall Medical Center research program and, 171–172
- Air Force theater hospital (AFTH), expeditionary medical support and, 199

AIT. See *Aeromedical isolation team (AIT)*.

Altitude, hemodynamic monitoring and, 178
hypoxemia and, 178
suction pressure and flow and, 178

Amphibious assault ships, forward surgical team on, 238–239
critical care nurse on, 239
ICU on, 236, 237
landing Marine Expeditionary Unit, 235
operating room on, 236
receiving and treating casualties, 235–236, 239
treatment room on, 236, 240
ward on, 236, 239

Army chemical/biological SMART (SMART-CB) team, **257–264**

ATI. See *Aircraft transit isolator (ATI)*.

B

- Biological safety level-4 (BSL-4), aircraft patient transport and, 247–252
aeromedical isolation team for, 247–248
training for, 249–251
aircraft transit isolators for, 247–249
operational team for, 249–250
personal protective equipment for, 249
care in, **245–255**
characteristics of, 245
patient care suite for, 246–249
admission records, USAMRIIDS, 247
disinfectant shower in, 248
engineering design of, 224
entry and exit of supplies and, 248
nursing challenges, 248–249
personal protective equipment for, 247–248
security and, 247
specialized training for, 249

Blue water nursing, **233–243**. See also
Shipboard nursing

C

Cardiopulmonary resuscitation, on NATO litter, 180

Casualty, contaminated, 185–186
 progression to hospital ship, battalion aid station, 214
 battle zone, 214
 combat zone fleet hospital, 215
 evacuation to noncombat zone hospital, 215
 surgical company, 215

Casualty Receiving and Treatment Ships (CRTS).
 See *Amphibious assault ships*.

CCATT. See *Critical care air transport team (CCATT)*.

Chemical/Biological Incident Response Force (CBRIF), US Marine Corps, 258

Chemical/biologic environment, patient contamination and, 260–262
 personal protection in, 262–263
 receiving patients from, 263

Chemical/biologic incident, decontamination of
 casualty in, 185–186
 patient care during, 262–263

Chemical/biologic threat, 257–258
 national response to, 258–259
 signs of potential attack, 258

Combat care, historical background of, 193–194

Critical care air transport team (CCATT), 226–231
 duty/rest cycle day of, 227–229
 equipment for, 227–228
 flying ICU and, 227
 history of, 226–227
 in joint trauma training center study, 150
 members of, 227
 nurses on, challenges and opportunities, 229–231
 operations since Desert Shield/Desert Storm, 231
 training for, 227–228

D

Dehydration, prevention of, during air transport, 177–178

Deployable ready assembly surgical shelter (DRASH), 194

Disaster needs, hospital ships and, 189

E

ECCT. See *Expeditionary critical care team (ECCT)*.

EMEDS. See *Expeditionary medical support (EMEDS)*.

Expeditionary critical care team (ECCT), on
 SPEARR team, 202

Expeditionary medical support (EMEDS), **201–212**
 ADVanced escheLON team and, 201
 in Operation Enduring Freedom, decontamination teams in, 205
 disaster teams and, 209
 EMEDS hospital in, aeromedical staging facility and, 208
 ancillary services tent and, 208
 communication blackout and, 206
 computed radiology system, 208
 emergency services for personnel, 207
 ICU in, 207–208
 infection control and, 209
 life skills tent and, 208
 medications dispensed, 207
 operating room in, 207
 public health personnel and, 208
 set up of, 206
 ward in, 208
 medical technicians in, 205–206
 need for portable Doppler ultrasound, 210
 patient care providers in, 205
 in Operation Houston, accomplishments of 591st Expeditionary Medical Squadron, 203–204
 deployment of teams, 203
 future needs learned, humanitarian upgrade package, 204
 infection control issues, 205
 linen, 204
 needleless intravenous supplies, 205
 upgrade of portable beds, 204–205
 modular packages in, 201–202
 small portable expeditionary aeromedical rapid response (SPEARR) team and, 202–203
 training course for, 202

F

Fleet hospital, design concept of, 213

Fleet Hospital Five, ISO modules, 213–214
 TEMPER tents on, 213–215
 treatment areas in, 213

Flight Nurse's Creed, 221

Forward surgical team (FST), administration of, 195
 army, **193–200**

capabilities, 194–195
 capabilities of, 194–195
 challenges of, 196
 combat care history and, 193–194
 concept, 194
 definition of, 193
 deployable ready assembly surgical shelter for, 194
 general purpose tent for, 194
 mission, 194
 Navy, assignment to, 236
 nursing responsibilities on, 197
 on amphibious assault ship, 238–239
 operating room for, 195
 organization of, administrative/operations, 195–196
 recovery/holding area, 195–196
 triage trauma management, 195
 postoperative care unit/ICU, 195
 recent missions of, 197–198
 training for, civil trauma center in, 196
 in soldier tasks, 196–197
 through support of military combat unit, 196

G

Global presence, **221–231**

H

Heat exhaustion, from Mission Oriented Protective Posture gear, 185–186
 Heat illnesses, 163–164
 body temperature regulation and, set point range in, 164
 skin blood flow in, 164
 C-reactive protein release in, 163–164
 heat shock protein 70 in, 163
 heat stroke, 163
 impact on combat unit, 163
 literature review, 164–169
 proinflammatory cytokine activation in, 163
 Heat stress, and rhabdomyolysis in exercising marines, **163–170**
 biochemical manifestations, implications for military nursing research, 166–167
 exercise and, endotoxin release into central circulation in, 166
 enzyme release in, 166
 heat dissipation during, 165
 failure of, biochemical effect of, 166

heat generation during, 165
 heat stress protein 70 in, 166
 leukocytosis in, 166
 proinflammatory cytokine release and effects in, 166–167
 proinflammatory effects of in exercising marines, 167–170
 proinflammatory mediators in, **163–170**

Hospital ships. See also *US Navy combatant ships*
 casualty progression to and from, 214–215
 conversion of ship to hospital capability, 189
 T-AH Mercy class, 189

Humanitarian needs, hospital ship and, 189

Human patient simulator (HPS), 151, 153, 154, 156–158

I

Intensive care unit (ICU), for forward surgical team, 195
 in expeditionary medical support hospital, in Operation Enduring Freedom, 207–208
 in flight, 227
 on hospital ship, 187

International Standards Organization (ISO) unit, on hospital ships, 214–216

International trauma and disaster management, **275–281**

Air Force Medical System and, key concepts in, 275–276
 history of, 275–276
 mobile education course for, 276–277
 countries participating in, 277–278
 modalities in, 278–282
 objectives of, 277
 outcomes of, 278
 trauma institute, South Africa, 282

J

Joint Trauma Training Center (JTTC) and USAF Nursing Warskills Simulation Laboratory response studies, **149–162**

Joint Trauma Training Center (JTTC study), of response readiness, 149–155
 Ben Taub General Hospital, 149–150
 military trauma team rotation and, 150–151
 program design, 150–151
 program outcomes, 153–155

simulation center, 151–152, 152
 shock room in, 151–152
 trauma surgery ICU in, 151, 153

M

MedEvac helicopters, 193
 MFST. See *Mobile field surgical team (MFST)*.
 Military medicine, *versus* civilian trauma care, 216
 Military operations other than war (MOOTW), 265
 Military trauma team (MTT), in joint trauma training center study, 150–151
 Military unique environment, critical care research program on, **171–181**
 Mobile Army Surgical Hospital (MASH), 191
 Mobile field surgical team (MFST), on SPEARR team, 202
 MOOTW. See *Military operations other than war (MOOTW)*.
 MTT. See *Military trauma team (MTT)*.

N

NATO litter, cardiopulmonary resuscitation on, 180
 skin pressure from, 175–177
 Navy hospital ships, **183–191**. See also *Fleet Hospital Five*
 casualty management on, case scenario, 188–189
 casualty receiving and, 187
 equipment and clinical support services in, 187
 of contaminated casualty, 185–186
 operating room or holding unit, 187
 postanesthesia care and intensive care units, 187–188
 transport to ship, 186–187
 triage on flight deck, 186
 wards, 188
 historical review of, 183–184
 staff for, assignment of, 184
 education of, 184–185
 orientation of, 184
 training of, 184–185
 Navy nurse anesthetists, Fleet Hospital Five, **213–220**
 Navy nursing. See also *Shipboard nursing*
 Surface Warfare Medical Department Officer and, 241–242

O

Operating room, for forward surgical team, 191
 in expeditionary medical support hospital, in Operation Enduring Freedom, 207
 in operation Desert Shield/Desert Storm, 217–218
 on hospital ship, 187
 Operation Desert Shield/Desert Storm
 anesthesia in, machine for, 217
 total intravenous, 218
 ventilators for, 217–218
 army forward surgical team in, 197–198
 buildup to hostilities, 218
 bunkers in, 218–219
 critical care air transport team in, 231
 Navy hospital ships in, 184
 navy nurse anesthetists, fleet hospital five, **213–220**
 onset of war, 218–219
 operating room and, 217–218
 prelude to end, 219
 setting considerations in, communication, 217–218
 heat, 216
 oxygen, 216–217
 water, 216
 Operation Desert Storm, 268
 Operation Enduring Freedom, 205–210
 army forward surgical team in, 197–198
 critical care air transport team in, 230
 Operation Houston, 201–203
 Operation Joint Endeavor, critical care air transport team in, 231
 Operation Just Cause, army forward surgical team in, 197
 Operation Noble Eagle, Navy hospital ships in, 184
 Operation Restore Hope, 266, 268
 Operation Sea Signal, Navy hospital ships in, 184, 186
 Operation Uphold Democracy, army forward surgical team in, 197–198
 Navy hospital ships in, 184
 P

P

Peace keeping operations, description of, 265
 Peace making operations, description of, 265
 Peace making/peace keeping missions, **265–273**
 candidates for care, 269

- coordination of care in, with other nations, 269–270
- levels of medical support in, 266–268
- medical planning for, 266
- military doctrine and, 267–268
- nursing roles in, 268–269
- soldiering skills in, 268
- training for, 269–271
- unit requirements in, 268
- Pentagon disaster, ground zero response team in, 144
 - recommendations and strategies in,
 - communication, 146
 - community involvement, 146
 - disaster plan fundamentals, 145
 - function without external support, 145–146
 - internal postcommunication, 147
 - organization of staff and volunteers, 146
 - respond to facts not rumor, 146
 - stress management/debriefing, 146–147
 - Virginia Hospital Center-Arlington in, patient arrival, 145
 - preparation in, 143–144
 - response of, 144
 - triage in, 145
- Personal protection equipment (PPE), level-A, 247–248
 - level-C, 251
- Personal protective equipment (PPE), full, 257
- Postanesthesia care unit (PACU), on hospital ship, 187
- Postoperative care unit (PCU), for forward surgical team, 195
- Pressure ulcers, prevention of, on NATO litter, 175–177

S

- Shipboard nursing, history of, 233
- Small portable expeditionary aeromedical rapid response (SPEARR) team, components of, 200
 - recommendations for, 200–201
 - subset of expeditionary medical support, 200–201
 - testing of, 200
- SMART-CB. See *Special Medical Augmentation Response Team-Chemical/Biological (SMART-CB)*.
- SPEARR team. See *Small portable expeditionary aeromedical rapid response (SPEARR) team*.

- Special Medical Augmentation Response Teams (SMARTs), SMART-CB, Army, 259
 - training for Army nurses, 260–261
 - Walter Reed Army Medical Center, 259–260
- Stretcher isolator (SI), for biological safety level-4, 249–251
- Suctioning, at altitude, effect on pressure and flow, 178
 - prevention of hypoxemia from, 178
 - during air transport, 178
- Surface Warfare Medical Department Officer (SWMDO), qualifications for, 242
 - training for, 241–242

T

- TEMPER (*tents, extendable, modular, personnel*) tents, 213–215
- Thermal stress, during air transport, on C-141 Starlifter, 179–180
 - on transport aircraft C-130 Hercules, 178–179
- Thermoregulation, in heat illnesses, 163
- Trauma care, military *versus* civilian, 210
- Triage, on flight deck, 186
- TriService Nursing Research Program (TSNRF), 171, 173–175
 - focus areas of, 173
 - mission of, 173
 - support of military relevant and unique research, 173–175

U

- United States Air Force (USAF), aeromedical evacuation and critical air transport, **221–231**
 - Medical Service, mission of, 180
 - Nursing Warskills Simulation Laboratory, 156–158
 - cognitive test evaluation of, 159–160
 - critical thinking coaching in, 157, 159
 - description of, 156–157
 - evaluation of, 157–159
 - human patient simulator in, 156–158
 - ongoing research at, 160–161
 - supplies in, 156–158
 - training and evaluation scenarios in, 155–156
 - ready response teams of, **201–212**

US Army Medical Command (USAMC), Special Medical Augmentation Response Teams, 258–259

US Army Medical Research Institute of Infectious Diseases (USAMRIID), 245

US Navy combatant ships. See also *Hospital ships*

- aircraft carriers, 234–236
- amphibious assault ships, 235–240
- assignment to, selection criteria for, 236–237
- Carrier Battle Group, 234
- critical care nurse on, on aircraft carrier *versus* amphibious assault ship, 238–239
- roles and responsibilities of, 237–238
- daily life on, 239–241
- forward surgical team on, 238–239
- Navy Corpsmen on, 241
- nursing on. See also *Shipboard nursing*.
 - leadership and teamwork in, 241
 - non-nursing duties and, 241
- occupational hazards on, 240
- time at sea, 239–240
- workday on, 241

USS Comfort, 183–184, 185

USS Intrepid, 183

USS Mercy, 183–184, 185

W

Walter Reed Army Medical Center, SMART-CB, 259–260

Ward, on hospital ship, 188

Wilford Hall Medical Center, critical care in military unique environment, **171–181**

- military research projects from, 172–173, 175–180
 - cardiopulmonary resuscitation, on NATO litter, 180
 - chest tube drainage, 175–176
 - dehydration prevention, 177
 - environmental effect on patient, 178
 - environment in practice of care, 175
 - hemodynamic monitoring, in aeromedical evacuation environment, 178
 - prevention of hypoxemia at altitude, suctioning-induced, 178
 - skin pressure with NATO litter, 175–177
 - thermal stress and human response, 178–180

TriService Nursing Research Program funding for, 171, 173

US Airforce Nursing Warskills Simulation Laboratory in, response readiness study, **149–162**
