

Chest X-ray quiz

Compiled by Marea Reading, CNC, St Vincent's Hospital, Sydney Australia

Question

Presented here is a posterior-to-anterior and lateral chest X-ray of a 43 year old man three days following cardiac surgery. What is the problem? What will need to be done? And are you happy with the location of the central vein catheter? Any other comments?

For answer and discussion turn to page 98 of this issue.
