

Chest X-ray quiz

Compiled by Marea Reading RN, Consultant Cardiothoracic Nursing Education, Formerly of St. Vincent's Hospital, Darlinghurst NSW

Question

This is an anterior-posterior (AP) chest X-ray of a 59 year-old man with a cardiomyopathy diagnosed 5 years ago. He required a naso-gastric tube (NGT) for nutritional support. Are you happy with the position of the NGT? What other comments would you make about this man's chest X-ray?

For answer and discussion turn to page 20 of this issue.
