

Chest X-ray quiz

Compiled by Marea Reading RN

Question

This is a follow up chest x-ray from the April issue. It is an erect anterior-to-posterior (AP) view of the patient who has undergone a double lung transplant. Are you now happy with the placement of the pulmonary artery (PA) catheter? What further comments would you make when reviewing this patient's chest x-ray?

For answer and discussion turn to page 167 of this issue.
