

# Index

Note: Page numbers of article titles are in **boldface** type.

## A

- Abscess, salivary gland, diagnostic imaging of acute, 280–282
  - in bacterial sialadenitis, 270–271
  - pediatric, 350
- Actinomycosis, cervicofacial, 270–271
- Acute infections, of salivary gland, diagnosis and management of bacterial, 297–304
  - epidemiology of bacterial, 353–355
  - diagnostic imaging of bacterial and viral, 280–282
- Adhesions, intraductal, formation after sialoendoscopy, 328
- Aerobic bacteria, salivary gland infection due to, 270
- Anaerobic bacteria, salivary gland infection due to, 270, 272
- Anorexia, enlargement of salivary glands in, diagnostic imaging of, 290–291
- Antiretroviral therapy, parotid swelling induced by, 341–342

## B

- Bacterial infections, of salivary gland, diagnosis and management of, 297–310
  - acute parotitis, 297–304
  - acute submandibular, 306–309
  - chronic parotitis, 304–306
  - chronic submandibular, 309
  - nontuberculous mycobacterial disease, 310
  - tuberculous mycobacterial disease, 309
- diagnostic imaging of, 280–282
- epidemiology of, 353–356
  - acute, 353–355
  - chronic, 355–356
- pediatric, 348–349
- Bacteriology, of salivary gland infections, **269–274**
  - identification of organisms, 272
  - microbiology, 269–272
    - newborns, 269–270
    - older children and adults, 270–272
  - pathogenesis, 269
    - due to anaerobic bacteria, 272
- Benign lymphoepithelial cysts, of salivary gland, HIV-associated, 340–342
- Boeck's disease, diagnostic imaging of, 289
- Bulimia nervosa sialadenosis, diagnostic imaging of, 290–291
  - treatment of, 347–348

## C

- Cancer, of salivary gland, HIV-associated, 342
- Case presentations, of salivary gland infections, **359–362**
- Children, older, microbiology of salivary gland infections in, 270–272
  - See also Pediatrics.
- Chronic infections, of salivary gland, case presentation, 362–363
  - diagnosis and management of, 304–310
    - parotitis, 304–306
    - submandibular, 309
  - diagnostic imaging of, 282–291
    - Boeck's disease (Heerfordt's syndrome), 289
    - enlarged glands due to bulimia, anorexia, or obesity, 290–291
    - juvenile recurrent parotitis, 283–284
    - myoepithelial sialadenitis (Sjogren's), 288–289
    - obstructive sialadenitis, 284–287
    - pneumoparotitis, 287
    - radiation-induced sialadenitis, 287
    - sclerosing sialadenitis of submandibular gland (Kuttner tumor), 282–283
    - tuberculosis, 290
- Collagen sialadenitis, 310
- Complications, of major salivary gland extirpation, **313–321**
  - in submandibular gland resection, 319
  - in superficial parotidectomy, 318
- Computed tomography (CT), diagnostic, of sialadenitis, 278–279
  - in diagnosis of pediatric salivary gland infections, 350
- Cysts, of salivary gland, benign lymphoepithelial, HIV-associated, 340–342
- Cytology, in diagnosis of pediatric salivary gland infections, 350

## D

- Diagnosis, of salivary gland infections, differential, 316–317
  - imaging, diagnostic. See Imaging, diagnostic.
  - initial evaluation, 294–296
  - pediatric, 349–351
  - predisposing features associated with, 294
- Differential diagnosis, of salivary gland infections, 316–317

Differential (*continued*)

- acute inflammatory disorders, 316
- chronic inflammatory disorders, 316–317

**E**

- Eating disorders, anorexia, enlargement of salivary glands in, 290–291
  - bulimia nervosa sialadenosis, 290–291, 347–348
- Epidemiology, of salivary gland infections, **353–357**
  - bacterial, 353–355
  - HIV-associated, 356
  - mumps, 356–357
- Epithelioid sialadenitis, diagnostic imaging of, 289
- Epstein-Barr virus, infection of salivary glands with, 335
- Erbium:yttrium-aluminum-garnet laser, intracorporeal laser lithotripsy for sialoliths, 326
- Extirpation, of major salivary gland. *See* Surgery.

**F**

- Foreign bodies, sialoendoscopy for obstruction due to, 324
- Fragmentation, mechanical, of sialoliths, 326

**H**

- Heerfordt's syndrome, diagnostic imaging of, 289
- Hepatitis C, infection of salivary glands with, 335–336
- Histopathology, of secretory unit of salivary gland, 314–316
- Holmium:yttrium-aluminum-garnet laser, intracorporeal laser lithotripsy for sialoliths, 326–327
- Human-immunodeficiency virus (HIV), salivary gland disease associated with, **339–343**
  - epidemiology, 356
  - parotid gland enlargement, 339–342
    - antiretroviral therapy-induced swelling, 341–342
  - benign lymphoepithelial cysts, 340–341
  - salivary gland malignancy, 342
- Hydatid disease, of parotid gland, 310

**I**

- Imaging, diagnostic, in sialadenitis, **275–292**, 296
  - in pediatric cases, 349–350
  - in specific diseases, 280–291
    - acute viral and bacterial sialadenitis and salivary gland abscess, 280–282
    - chronic sialadenitis, 282–291
  - procedures, 275–280
    - conventional radiology, 275
    - conventional sialography, 275–276

- CT and CT sialography, 278–279
- MRI and MRI sialography, 279–280
- scintigraphy, 280
- ultrasound, 276–278

- Infection, postoperative, after sialoendoscopy, 328
- Inflammatory disorders, in differential diagnosis of salivary gland infections, 316–317
  - acute disorders, 316
  - chronic disorders, 316–317

**J**

- Juvenile recurrent parotitis, case presentation, 361–362
  - diagnostic imaging of, 283–284
  - epidemiology of chronic recurrent, 356
  - pathophysiology and epidemiology, 345–336
  - treatment, 336–347

**K**

- Kuttner tumor, diagnostic imaging of, 282–283

**L**

- Laser lithotripsy, intracorporeal, for sialoliths, 326–327
  - erbium:yttrium-aluminum-garnet laser, 326
  - holmium:yttrium-aluminum-garnet laser, 326–327
- Lithotripsy, for treatment of sialoliths, 326
  - intracorporeal laser, 326–327
    - erbium:yttrium-aluminum-garnet laser, 326
    - holmium:yttrium-aluminum-garnet laser, 326–327
- Lymphoepithelial cysts, benign, of salivary gland, HIV-associated, 340–342

**M**

- Magnetic resonance imaging (MRI), diagnostic, of sialadenitis, 279–280
  - in diagnosis of pediatric salivary gland infections, 350
- Malignancy, salivary gland, HIV-associated, 342
- Mechanical fragmentation, of sialoliths, 326
- Microbiology, of salivary gland infections, 269–272
  - newborns, 269–270
  - older children and adults, 270–272
- Mucous plugs, sialoendoscopy for obstruction due to, 323–324
- Mumps. *See* Paramyxovirus-induced parotitis.
- Mycobacteria, non-tuberculous salivary gland disease, 310
  - salivary gland infection due to, 270
  - tuberculous salivary gland disease, 309
- Mycobacterium tuberculosis*, infection of salivary gland with, 309

Myoepithelial sialadenitis, diagnostic imaging of, 288–289

## N

Neonates, microbiology of salivary gland infections in, 269–270

## O

Obesity, enlargement of salivary glands in, diagnostic imaging of, 290–291

Obstructive sialadenitis, chronic, diagnostic imaging of, 284–287  
 intraoperative imaging and postoperative follow-up, 287  
 sialoendoscopy for, **323–329**

Operative techniques. *See* Surgery.

Outbreaks, of paramyxovirus-induced parotitis (mumps), 333–334

## P

Paramyxovirus-induced parotitis (mumps), 331–335  
 case presentation, 361  
 complications, 332–333  
 epidemiology, 356–357  
 history, 331  
 outbreaks, 333–334  
 signs and symptoms, 331–332  
 treatment, 332  
 vaccines, 334–335

Parasitic infections, of salivary gland, 310

Parotid gland, anatomy of, 313–314  
 enlargement of, HIV-associated, 339–342  
 antiretroviral therapy-induced swelling, 341–342  
 benign lymphoepithelial cysts, 340–341  
 hydatid disease of, 310

Parotidectomy, superficial, for salivary gland infection, 317–318  
 early complications, 318  
 late complications, 318  
 operative technique, 317–318

Parotitis, acute bacterial, epidemiology of, 354–355  
 bacteriology of, 269–272  
 chronic bacterial, epidemiology of, 355–356  
 juvenile recurrent, case presentation, 361–362  
 diagnostic imaging of, 283–284  
 epidemiology of chronic recurrent, 356  
 pathophysiology and epidemiology, 345–346  
 treatment, 336–347  
 paramyxovirus-induced (mumps), 331–335  
 complications, 332–333  
 history, 331  
 outbreaks, 333–334

signs and symptoms, 331–332

treatment, 332

vaccines, 334–335

postsurgical, case presentation, 360–361

Pathogenesis, of salivary gland infections,  
 bacterial, 269

due to anaerobic bacteria, 272

Pediatrics, salivary gland infections, **345–352**

diagnostics, 349–351

pathology and epidemiology, 345–346

treatment, 346–349

bacterial, 348–349

bulimia nervosa sialadenosis, 347–348

juvenile recurrent parotitis, 346–347

pneumoparotitis, 347

viral, 348

Peripheral nerve function, changes in, after sialoendoscopy, 328

Physical examination, in diagnosis of salivary gland infections, 294–296

Pneumatic lithotripsy, intracorporeal, for sialoliths, 327

Pneumoparotid, pediatric, treatment of, 350–351

Pneumoparotitis, diagnostic imaging of, 287

pediatric, treatment of, 347

Predisposing features, associated with salivary gland infections, 294

## R

Radiation-induced sialadenitis, diagnostic imaging of, 287

Radiology, conventional, in diagnostic imaging of sialadenitis, 275

Ranula formation, after sialoendoscopy, 328

Recurrent infections, of salivary gland. *See also* Chronic infections.  
 case presentation, 359

## S

Salivary gland infections, 269–362

bacteriology of, **269–274**

identification of organisms, 272

microbiology, 269–272

newborns, 269–270

older children and adults, 270–272

pathogenesis, 269

due to anaerobic bacteria, 272

case presentations of, **359–362**

diagnosis and management of, **293–312**

bacterial, 297–310

collagen, 310

initial evaluation, 294–296

parasitic, 310

diagnostic imaging in, **275–292**

in specific diseases, 280–291

procedures, 275–280

Salivary (*continued*)

- epidemiology of, **353–357**
  - bacterial, 353–355
  - HIV-associated, 356
  - mumps, 356–357
- pediatric, **345–352**
  - diagnostics, 349–351
  - pathology and epidemiology, 345–346
  - treatment, 346–349
    - bacterial, 348–349
    - bulimia nervosa sialadenosis, 347–348
    - juvenile recurrent parotitis, 346–347
    - pneumoparotitis, 347
    - viral, 348
- sialoendoscopy and salivary gland-sparing surgery, **323–329**
- surgery for, operative techniques, 317–320
  - future directions, 319–320
  - submandibular gland resection, 319
  - superficial parotidectomy, 317–318
    - early complications, 318
    - late complications, 318
- viral, 331–343
  - HIV-associated, **339–343**
  - non-HIV, **331–338**
- Salivary glands, anatomy of major, **313–321**
  - parotid gland, 313–314
  - secretory unit, 314–316
  - submandibular, 314–315
- Scintigraphy, diagnostic, of sialadenitis, 280
- Sclerosing sialadenitis, chronic, of submandibular gland, diagnostic imaging, 282–283
  - epidemiology, 356
- Secretory unit, histopathology of, 315–316
- Sialadenitis. *See also* Salivary gland infections.
  - chronic, diagnostic imaging of, 282–291
    - epithelioid cell, 289–290
    - myoepithelial, 288–289
  - obstructive, 284–287
    - intraoperative imaging and postoperative follow-up, 287
  - radiation-induced, 287
  - sclerosing, of submandibular gland, 282–283
- Sialadenosis, enlargement of salivary glands in, diagnostic imaging of, 290–291
  - in bulimia nervosa, treatment of, 347–348
- Sialocele formation, after sialoendoscopy, 328
- Sialoendoscopes, 323
- Sialoendoscopy, and salivary gland-sparing surgery, **323–329**
  - history, 323
  - indications for, 323–325
    - foreign bodies, 324
    - mucous plugs, 323–324
    - sialolithiasis, 324
    - strictures, 324–325
  - perioperative management, 327
    - possible complications, 327–328
    - postoperative management, 327
    - techniques, 325–327
      - extracorporeal lithotripsy, 327
      - intracorporeal laser lithotripsy, 326–327
      - lithotripsy, 326
      - mechanical fragmentation, 326
      - pneumatic lithotripsy, 327
      - sialoendoscopy-assisted sialolithectomy, 326
      - technology, 323
- Sialography, in diagnosis of pediatric salivary gland infections, 349–350
  - in diagnostic imaging of sialadenitis, 275–280
    - conventional, 275–276
    - CT, 278–279
    - MRI, 279–280
- Sialolithectomy, sialoendoscopy-assisted, 326
- Sialolithiasis, sialoendoscopy for obstruction due to, 324
- Sjögren's disease, diagnostic imaging of, 288–289
- Sjögren's syndrome, diagnostic imaging of, 288–289
- Staphylococcus aureus*, salivary gland infections due to, 269–272
- Stones, salivary. *See* Sialolithiasis.
- Strictures, sialoendoscopy for obstruction due to, 324–325
- Subglossal scar band formation, after sialoendoscopy, 328
- Submandibular gland, acute bacterial sialadenitis of, case presentation, 359–360
  - diagnosis and management, 306–309
  - epidemiology, 355
  - anatomy of, 314–315
  - chronic recurrent sialadenitis of, diagnosis and management, 309
  - epidemiology, 356
  - chronic sclerosing sialadenitis of, diagnostic imaging, 282–283
  - epidemiology, 356
  - resection of, 319
- Surgery, for salivary gland infections, 317–320
  - future directions, 319–320
  - submandibular gland resection, 319
  - superficial parotidectomy, 317–318
    - early complications, 318
    - late complications, 318

## T

Tuberculosis, diagnostic imaging of, 290

## U

Ultrasonography, in diagnosis of pediatric salivary gland infections, 349

Ultrasound, diagnostic, of sialadenitis, 276–278

**V**

- Vaccines, for paramyxovirus-induced parotitis (mumps), 334–335
- Viral infections, of salivary glands, HIV-associated disease, **339–343**
  - parotid gland enlargement, causes of, 339–342
  - salivary gland malignancy, 342
  - non-HIV, **331–338**
    - Epstein-Barr virus, 335
    - hepatitis C, 335–336
    - others, 336
    - Paramyxovirus-induced parotitis (mumps), 331–335
    - pediatric, 348
- Viral infections, of salivary gland, diagnostic imaging of, 280–282
