

Index

A

- Acid-related disease
 - treatment of
 - historical perspectives on, 23–29
- Antireflux surgery
 - for GERD, 189–190
- Asthma
 - GERD and
 - treatment of
 - medical, 63–64

B

- Bard endocinch, **75–88**
 - clinical evaluations with, 97–98
 - clinical experience with, 93–95
 - clinical outcome with, **89–101**. *See also Gastroesophageal reflux disease (GERD), endoscopic suturing for.*
 - clinical technique of, 90–95
 - conical valve prosthesis attachment
 - in, 87
 - cutting thread in, 84–87
 - development of, 76–87
 - devices related to, 76–87
 - elastic rings in, 87
 - knot typing in, 83–84
 - sewing devices in, 76–79, 80–83
 - tag and thread in, 80
- Barrett, Norman
 - in GERD treatment, 34–38
- Barrett's esophagus
 - treatment of
 - medical, 60
- Belsey, Ronald
 - in GERD treatment, 45–47

C

- Cancer
 - prevention of
 - GERD treatment in, 70
- Cardia
 - anatomy of, 210–212

Chest pain

- GERD and
 - treatment of
 - medical, 64

Children

- GERD in
 - treatment of
 - historical perspectives on,
 - 47–51

Cough

- chronic
 - GERD and
 - treatment of
 - medical, 65

D

- Diaphragmatic sphincter
 - and hiatal hernia, 8–11

E

- Endocinch
 - Bard, **75–88**. *See also Bard endocinch.*
- Endoscopic full-thickness plication
 - for GERD, **109–116**
 - described, 110
 - instrumentation in, 110–111
 - study in humans, 114–116
 - study in pigs, 111–114
- Endoscopic Plication System
 - full-thickness
 - for GERD, 110–111
- Endoscopic suturing
 - for GERD, **89–101**. *See also Gastroesophageal reflux disease (GERD), endoscopic suturing for.*
- Endoscopic therapy
 - for GERD, 71–72, **117–125, 199–207**
 - comparison with currently available therapies, 202–203
 - cost-effectiveness of, 205
 - effectiveness of, 201–202

- durability of, 203–204
 - measurements of, 217–218
 - future directions in, 218
 - issues related to, 200–201
 - optimization of, 216–217
 - safety of, 204–205
 - technical issues related to, 213–216
 - Endoscopic ultrasound
 - in Stretta procedure for GERD, 143
 - Enteryx
 - described, 190–191
 - endoscopic implantation of
 - for GERD, **189–198**
 - preclinical studies of, 191–192
 - procedure for, 192–193
 - results of, 194–196
 - Esophagitis
 - treatment of
 - historical perspectives on, 29–34
 - Esophagogastric junction (EGJ)
 - anatomy of, 210–212
 - functional constituents of, 2–5
 - incompetence of
 - in GERD, 5–14
 - diaphragmatic sphincter and hiatal hernia in, 8–11
 - gastroesophageal flap valve and, 11
 - lower esophageal sphincter hypotension and, 8
 - transient lower esophageal relaxations and, 6–8
 - relaxed
 - mechanical properties of, 12–14
 - Esophagus
 - Barrett's
 - treatment of
 - medical, 60
 - Esophagectomy
 - in Stretta procedure for GERD, 143
-
- F**
- Flexible Ti Knot Device, 105
 - Fundoplication
 - Nissen and
 - in GERD treatment, 43–45
-
- G**
- Gastroesophageal barrier
 - failure of
 - causes of, 123–124
 - consequences of, 123–124
 - physiology of, 118–123
 - Gastroesophageal flap valve
 - esophagogastric junction incompetence
 - in GERD and, 11
 - Gastroesophageal reflux disease (GERD)
 - anatomic pathophysiology of, 209–210
 - antireflux agents in
 - mechanism of action of, 171–173
 - described, 165, 199
 - endoscopic full-thickness plication for, **109–116**. *See also Endoscopic full-thickness plication, for GERD.*
 - endoscopic implantation of Enteryx for, **189–198**. *See also Enteryx, endoscopic implantation of, for GERD.*
 - endoscopic suturing for, **89–101**
 - effect on 24-hour pH exposure, 96
 - effect on medication use, 95–96
 - future studies in, 99
 - in symptom control, 95
 - long-term follow-up after, 97
 - lower esophageal sphincter pressure effects of, 96–97
 - plication pattern in, 98–99
 - endoscopic treatment of, **117–125, 199–207**. *See also Endoscopic therapy, for GERD.*
 - erosive
 - treatment of
 - medical, 58–59
 - esophagogastric junction incompetence in
 - mechanisms of, 5–14. *See also Esophagogastric junction (EGJ), incompetence of, in GERD.*
 - extrasophageal
 - treatment of
 - approach to, 65
 - Gatekeeper Reflux Repair System for, **177–187**. *See also Gatekeeper Reflux Repair System, for GERD.*
 - implantation therapy for, **155–163**. *See also Implantation therapy, for GERD.*
 - intraluminal transgastric valvuloplasty
 - for, 124–131
 - manifestations of
 - atypical
 - treatment of
 - medical, 63
 - microinvasive gastric stapler for, **117–133**. *See also Microinvasive gastric stapler, for GERD.*
 - non-erosive
 - treatment of
 - medical, 60
 - pathophysiologic mechanism of, 189
 - pathophysiology of, **1–17**. *See also Esophagogastric junction (EGJ), incompetence of, in GERD.*

Plexiglas implantation for, **165–176**
 prevalence of, 189
 progression of, 122
 Stretta procedure for, **135–145**,
147–154. *See also Stretta procedure, for GERD.*
 symptomatology of
 etymology of, 22–23
 treatment of
 antireflux surgery for, 189–190
 current status of, 51–53
 goals of, 199–200
 historical perspectives on, **19–55**
 acid-related disease
 treatments, 23–29
 Asher Winkelstein in, 38–39
 esophagitis, 29–34
 fundoplication, 43–45
 holisticism, 39–41
 laparoscopy, 47
 Norman Barrett in, 34–38
 pediatric-related issues,
 47–51
 quo vadis in, 53–54
 Ronald Belsey in, 45–47
 surgical strategies' evolution,
 41–43
 ye meri, 20–21
 ysopaghus, 20–21
 intraluminal
 targets of, 14–15
 medical, **57–68**
 asthma-related, 63–64
 efficacy of, 57–58
 for Barrett's esophagus
 symptoms, 60
 for chronic cough, 65
 for reflux laryngitis, 64
 for unexplained chest pain, 64
 in refractory patients, 61–63
 initial management, 63
 maintenance therapy, 60–61
 novel approaches to, 65–66
 safety of, 57–58
 surgical
 cost-effective, 70
 described, 69–70
 endoscopic, 71–72
 failure of, **69–73**
 in cancer prevention, 70
 limitations of, 71
 safety of, 70–71
 side effects of, 70–71
 studies required for, 72
 success of, **69–73**
 standards for measure-
 ment of, 71
 types of, 189–190, 200
 Wilson Cook Endoscopic Suturing
 Device in, **103–108**

Gatekeeper Reflux Repair System
 for GERD
 clinical experience with, 181–186
 multi-center studies,
 182–184
 pilot study, 181–182
 prosthesis removal in,
 184–186
 pre-clinical experience with, 180
 technique of, 177–180

GERD. *See Gastroesophageal reflux disease (GERD).*

Hernia(s)
 hiatal
 diaphragmatic sphincter and, 8–11
 holisticism and
 historical perspectives on,
 39–41
 Hiatal hernia
 diaphragmatic sphincter and, 8–11
 holisticism and
 historical perspectives on, 39–41
 Holisticism
 hiatal hernia and
 historical perspectives on, 39–41
 Hypotension
 lower esophageal sphincter
 esophagogastric junction incompe-
 tence in GERD and, 8

I

Implantation therapy
 for GERD, **155–163**
 animal model studies of
 historical background of,
 156–157
 current status of, 159–160
 future of, 160–162
 historical background of, 155–159
 human studies with collagen
 historical background of,
 157–159
 implant material in
 historical background of,
 155–156
 rationale for
 historical background of, 155
 Plexiglas, **165–176**. *See also Plexiglas implantation.*
 use in medicine, 166–167
 Intraluminal transgastric valvuloplasty
 for GERD, 124–131

L

-
- Laparoscopy
in GERD treatment
historical perspectives on, 47
- Laryngitis
reflux
GERD and
treatment of
medical, 64
- Lower esophageal sphincter (LES)
anatomy of, 210–212
physiology of, 118–123
- Lower esophageal sphincter hypotension
esophagogastric junction incompetence
in GERD and, 8

M

-
- Minimally invasive gastric stapler
for GERD, **117–133**

N

-
- Nissen, Rudolf
in GERD treatment, 43–45

P

-
- Pain
chest
GERD and
treatment of
medical, 64
- Plexiglas implantation, **165–176**
for GERD, **165–176**
clinical experience with, 169–171
evaluation of, 169–170
mechanism of action of, 171–173
patient selection for, 169
preclinical experience with,
167–168
results of, 170–171
interpretation of, 173–174
study discussion, 171–175
technique of, 168–169
considerations involved in,
174–175
- Polymethylmethacrylate implantation,
165–176. *See also*
Plexiglas implantation.

R

-
- Reflux laryngitis
GERD and
treatment of
medical, 64

S

-
- SewiRight device, 104–105
- Stretta procedure
for GERD, **135–145, 147–154**
clinical efficacy of, 149–153
described, 137–139
endoscopic ultrasound in, 143
equipment for, 136–137
human esophagectomy in, 143
mechanisms of action of, 147–148
patient selection for, 148–149
pre-clinical studies in, 139–141
radiofrequency energy in, 135–136
reduction in tLESR triggering after
radiofrequency delivery in
canine model, 141–143
safety of, 149
tolerability of, 149
- Symptomatology
etymology of, 22–23

U

-
- Ultrasound
endoscopic
in Stretta procedure for GERD, 143

V

-
- Valvuloplasty
intraluminal transgastric
for GERD, 124–131

W

-
- Wilson Cook Endoscopic Suturing Device,
103–108
described, 103–104
- Winkelstein, Asher
in GERD treatment, 38–39
