

Errata

ERRATUM

In the July/August issue, 2009;29(4), an inadvertent data error was made on page 297, Figure 3. The caption was incorrect in stating that "58% [of surgeons] reported performing revisions in 58% of their cases." It should have read: "58% [of surgeons] reported performing revisions in 0% to 5% of their cases."

ERRATUM

In the Editorial from Dr. Foad Nahai which appeared in the September/October issue of ASJ (2009;29(5), page 443), Dr. Nahai's "Safety Diamond" description was incorrectly attributed to The American Society for Aesthetic Plastic Surgery in the references. The original description of the "Safety Diamond" actually appeared in reference 6, Clinical Risk (in press).
